NOTIFICATION OF TRANSMITTAL OF INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Rule 71.1)

Date of mailing (day/month/year)

19. 11. 01

Applicant's or agent's file reference

PA/GV99 PCT

IMPORTANT NOTIFICATION

International application No.

International filing date (day/month/year)

Priority date (day/month/year)

PCT/GB 00/03123

14/08/2000

14/08/1999

Applicant

DIXON, Antony Robert et al.

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

#### 4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

### VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted: see separate sheet

#### Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

#### 1. State of the art

Reference is made to the following document:

D1: FR-A-467 816

#### 2. <u>Independent claim 1</u>

- 2.1 The present application meets the requirements of Article 33(1) PCT, because the subject-matter of claim 1 is novel and involves an inventive step in the sense of Article 33(2) and (3) PCT.
- 2.2 The document D1 is regarded as being the closest prior art to the subject-matter of claim 1, and discloses (the references in parentheses applying to this document):

A desk (cf. fig. 1) which comprises a base-structure 5,7,8 and a desk-top 6 supported by the base-structure 5,7,8 and which is convertible for use as a bed by movement of the desk-top 6 relative to the base-structure (cf. page 1, lines 37-43), the desk-top 6 when so moved being supported by the base-structure to extend substantially horizontally on legs from the base-structure 5,7,8 for defining with it an elongate substantially-horizontal support-surface 17 of the bed (cf. fig. 4).

- 2.3 The subject-matter of claim 1 therefore differs from this known desk in that: The legs are carried by the desktop, and that the legs are carried by the desk-top in a folded condition for selective deployment in the support of the desk-top extending from the base structure.
- 2.4 None of the remaining available prior art discloses or suggests the distinguishing features of the amended version of claim 1. Thus, independent claim 1 is novel

and involves an inventive step (Article 33(1) PCT).

- 3. Dependent claims 2-9
- 3.1 Claims 2-9 depend on claim 1 and thus they also fulfill the criteria of the PCT in respect of novelty and inventive step (Article 33(1) PCT).

#### Re Item VII

#### Certain defects in the international application

- 1. Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the document D1 is not mentioned in the description, nor is this document identified therein.
- 2. The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).

1

#### Claims:

- 1. A desk which comprises a base-structure and a desktop supported by the base-structure and which is
  convertible for use as a bed by movement of the desk-top
  relative to the base-structure, the desk-top when so
  moved being supported by the base-structure to extend
  substantially horizontally on legs from the basestructure for defining with it an elongate substantiallyhorizontal support-surface of the bed, characterised in
  that the legs are carried by the desk-top, and that the
  legs are carried by the desk-top in a folded condition
  for selective deployment in the support of the desk-top
  extending from the base-structure.
- 2. A desk according to Claim 1 wherein the desk-top is pivotally mounted on the base-structure.
- 3. A desk according to Claim 2 wherein the desk-top is pivoted to a frame-member that is itself pivoted to the base-structure, and wherein the frame-member extends substantially horizontally from the base-structure intermediate the base-structure and the desk-top as part of said support-surface when the desk is converted to a bed as aforesaid.
- 4. A desk according to any one of Claims 1 to 3 includes recesses for accommodating and retaining a mattress or futon within the desk, the recesses extending within the desk from a first recess covered by the desk-top into a second recess located behind an upright wall of the base-structure.
- 5. A desk according to Claim 4 wherein the desk-top when moved relative to the base-structure for conversion of the desk to a bed uncovers the first recess part to

Empf.nr.:573 P.OO3

AMENDED SHEET

PAGE 04

2

enable release of the mattress or futon from within the second recess part for deployment on the support-surface.

- 5. A desk according to Claim 1 or Claim 2 wherein the desk-top is pivoted to the base-structure for lifting up and over to extend upside down substantially horizontally from the base-structure.
- 7. A desk according to any one of Claims 1, 2 and 6 wherein an upper work-surface of the desk-top is backed by a sheet of plastics foam such that said sheet is uppermost when the desk is converted to a bed as aforesaid.
- 8. A desk according to any one of Claims 1, 2, 6 and 7 wherein the base-structure is a pedestal-supported panel having an upper surface of plastics foam.
- 9. A desk according to any one of Claims 1, 2 and 6 to 8 including means for selective adjustment of the height of the base-structure.
